In case you missed it...

Youth invited to apply for the North Dakota Career Tour

If you've ever been curious about what powers your world, this is your chance to explore. From coal mines and power plants to wind turbines and electric cooperatives, you'll get hands-on experiences and hear directly from the experts who drive North Dakota's energy sector. Learn more and apply on our website, www.morgransou.com/north-dakota-career-tour.

Membership appreciation events return for 2025

We are excited to announce that we are hosting a few member meetings across our service territory this spring! Join us for one of our membership appreciation events, and enjoy food and visit with our board of directors, CEOs, staff and other members. All members are invited for a fun-filled night of bingo and camaraderie.

Read these stories and more in this month's issue of *North Dakota Living*.

MOR-GRAN-SOU
ELECTRIC COOPERATIVE

STEPS TO RESTORING POWER

When a major outage occurs, our crews restore services to the greatest number of people in the shortest time possible - until all members have power.

1. AN OUTAGE IS REPORTED

A member calls in to notify Mor-Gran-Sou Electric that they are without power.

2. DEPLOY CREWS

Crews are deployed to assess the situation and restore power.

3. CREWS RESTORE POWER TO HIGH-VOLTAGE TRANSMISSION LINES

Crews restore power first to high-voltage transmission lines. These lines carry large amounts of electricity. They rarely fail but must be repaired first.

4. NEXT RESTORING DISTRIBUTION SUBSTATIONS

Crews inspect substations, which can serve hundreds or thousands of people.

5. THEN MAIN DISTRIBUTION LINES

Main lines serve essential facilities like hospitals and larger communities.

6. INDIVIDUAL HOMES AND BUSINESSES

After main line repairs are complete, we repair lines that serve individual homes and businesses.
